

In-Class Exercise 4: Display with Style

1. Start with the sample main.html file (<https://www.clear.rice.edu/comp431/sample/main.html>)
2. When the user enters their username and clicks “login”
 1. “login” changes to “logout”
 2. The username is displayed
 3. The username text field becomes hidden
 4. The hidden “share” text field and “post” button become visible. The post button won’t do anything when clicked.

HINT: see https://www.w3schools.com/jsref/prop_style_display.asp

3. When the user clicks “logout”, the reverse happens
4. Upload your main.html file to Canvas (IC4)
