

In-Class Exercise 3: Hello JavaScript

1. Start with hello.html from IC1. You can also copy sample:

<https://www.clear.rice.edu/comp431/sample/hello.html>

2. Use interval with ``, create a countdown clock

- starts at 10 second when page loads
- span *innerHTML* field has span value
- ends at 0, then redirects page to (<https://www.rice.edu>). Hint: use location *href*.

3. Use timeout, alert user after 5 seconds: "The page will redirect when the counter reaches zero"

4. Upload your hello.html file to Canvas (IC3)
