

In-Class Exercise 11: React with Redux

1. `>> npm install --save react-redux @reduxjs/toolkit`
2. Download <https://www.clear.rice.edu/comp431/sample/tictactoe/react/tictactoeSlice.js>, add to `src/features/game` directory
3. Download <https://www.clear.rice.edu/comp431/sample/tictactoe/react/index-redux.js>, rename `index.js` and add to `src` directory
4. Download <https://www.clear.rice.edu/comp431/sample/tictactoe/react/Board.js>, add to `src` directory
5. Add selectors in `Board.js` for series, player turn, and status
6. Fill in reducer `selectSquare` in `tictactoeSlice.js` to track tictactoe moves and series wins (hint: access data from `action.payload`)
7. `>> npm run start`
8. Verify that the player win series is updated appropriately. Players alternate even after a win or tie

[Submit](#) `tictactoeSlice.js` and `Board.js` to IC 11
